

YOUR DIRECT PIPELINE TO REAL-TIME DATA.

Today, ensuring that your pipeline is traceable, verifiable and compliant is more important than ever before. SpreadBoss® is the innovative pipeline tracking system that redefined the industry standard for recording, organizing, storing and retrieving all data and documents associated with your pipe and components. With SpreadBoss, your team can continually view data 24/7, in real-time, from any location — even as it is being collected. Looking for the smart way to track pipe? SpreadBoss is the answer.

SpreadBoss tracks the exact location and status of every shipment, helping projects stay on schedule and on budget.

INVENTORY CONTROL

Now it's easy to check inventory before new purchases, so you can utilize leftover material more efficiently.

RIGHT-OF-WAY / AS-BUILT

SpreadBoss quickly and easily integrates with engineering, survey and GIS groups to provide a complete blueprint of your project, so your crews have pipe when and where they need it, minimizing downtime in the field.

DOCUMENT CONTROL

SpreadBoss® provides a powerful content repository, organized in a familiar folder tree structure to simplify document retrieval. Virtually all printed, scanned, recorded and manually input data associated with your pipeline is readily accessible to approved users. The secure system offers full audit capabilities, so that you can verify and ensure full compliance with DOT and other regulatory agencies.

SpreadBoss stores more than the data collected via barcodes and scanners. The DocuVista component is a stand-alone electronic document and image repository that uses OCR technology to capture original paper-based records for storage, management, retrieval and export. DocuVista links to all sections of related archives, so all documents are accurate, traceable and verifiable. This fully integrated database can be accessed simultaneously by multiple users via USB, portable hard drive or disc, without having to connect to the Internet. By merging paper-based with digital data, it becomes easier than ever to accommodate DOT audits, or to respond to any request for proof of compliance.

TRACEABILITY

Whether in transit, in storage, or in the field, you can now see the exact location of any pipe you've ordered, shipped or used.

VERIFICATION

Shortages and invoice variations are a thing of the past. You'll know with 100% certainty that you get the pipe you paid for, every time.

COMPLIANCE

Checking, location and documenting pipe for regulation and compliance purposes is now easy and effortless.

RELIABILITY

SpreadBoss lets you avoid shortages and redundant orders, and manage your inventory more efficiently.

EVERYTHING YOU NEED TO KNOW. INSTANTLY.

Simply put, SpreadBoss is the smartest way to track, trace, manage, store and locate all data and documentation associated with pipes and joints. SpreadBoss boosts the performance of every person in your organization who works with pipeline data, and enables you to develop pipe inventory strategies to reduce costs, ensure traceability and compliance, create savings, and improve efficiencies.
